CONFIDENTIAL CLIENT AUDIT & PRE-IMPLEMENTATION REPORT

RACube Technologies (racube.com)

Official Genesys Premier Partner | Enterprise CX, Cloud & AI Modernization

Deep Technical On-Page SEO Audit (Screaming Frog Crawl Integration), Multi-Dimensional Competitor Gap Analysis & 6-Month SEO/SMO Strategic Marketing Plan

Client Entity:	RACube Technologies LLC (Plano, TX, USA) | Website: https://racube.com/
Audit Sources:	Full 24-Page Live Browser Inspection + Screaming Frog SEO Spider Diagnostic Crawl
Engagement Scope:	23 Technical SEO Issues, Competitor Gap (Traffic/Backlinks/Keywords), 6-Month Execution Roadmap
Deliverable Date:	October 2026 | Version 2.0 (Expanded Pre-Implementation Review)

Executive Summary

RACube Technologies (racube.com) is an enterprise CX transformation consultancy and certified Genesys Premier Partner headquartered in Plano, Texas. Unlike traditional system integrators, RACube operates an elite dual-engine business model combining enterprise migration delivery pods with 9 proprietary SaaS/DevOps software products (such as RAautomiTe for continuous CCaaS Disaster Recovery sync, RADash for real-time operations, and Secure PAuse for HIPAA/PCI-DSS recording compliance).

CRITICAL DIAGNOSTIC VERDICT: Integrating findings from both the live browser audit and the Screaming Frog SEO Spider crawl reveals that while the website displays modern aesthetics and fast server response times (TTFB ~211 ms), it suffers from 23 distinct technical on-page and indexing vulnerabilities. Most notably: 96% of pages lack canonical tags, robots.txt and sitemap.xml return HTTP 404, 100% of images lack size attributes (causing Cumulative Layout Shift), insecure HTTP internal links exist, and 0 JSON-LD structured schemas are deployed. These issues explain RACube's near-zero organic search visibility for commercial migration keywords despite having superior proprietary IP.

1. Website, Architecture & Services Audit

Corporate Footprint & Credentials: Headquartered in Plano, Texas (5717 Legacy Dr, Suite 250), RACube operates global delivery pods across North America, EMEA, and APAC. Reported track record includes **25+ Enterprise Engagements**, **40+ Cloud Transformations**, **80+ Modernizations**, **42% Average Handle Time (AHT) Reduction**, and a **99.99% Uptime SLA**.

Proprietary Software Suite (RACube IP Moat)

Product	Enterprise Capability & Functional Value	Target Platforms
RAautomiTe	DR Sync Engine: continuous configuration replication to standby orgs for failover.	Genesys Cloud, Amazon Connect
RAautomiTe-Ops	DevOps & CI/CD for CX: automated promotion from Dev/Test through UAT to Prod.	CCaaS Platforms
RAautomiTe-Backup	Scheduled, versioned configuration backups with granular point-in-time recovery.	Genesys Cloud, Amazon Connect
RADash-O	Real-Time Operations Dashboard: queue supervision, agent readiness, clinic control.	Genesys, Amazon Connect, NICE
RADash-P	Historical Performance Portal: single-pane tracking of callbacks, volume, and SLAs.	Genesys, Amazon Connect, NICE
RALogEd	Audit & Log Intelligence: tamper-evident repository for SOC 2, HIPAA, PCI-DSS, GDPR.	Genesys, Amazon Connect, NICE
Secure PAuse	Automated compliance recording pause/resume during sensitive payment/PII entry.	Enterprise Call/Screen Recorders
RAOutbase	Outbound Campaign Automation: CRM list sync, retry cadence, DNC suppression.	Genesys Cloud Outbound
PHI	Clinical PHI De-Identification: AI scrubbing of 16 HIPAA Safe Harbor identifiers.	Healthcare EHR / CX Systems

2. Deep Technical On-Page SEO Audit (Screaming Frog Diagnostic)

Issue Description	Type	Priority	URLs	Technical Diagnosis & Remediation Required
Security: Insecure HTTP URLs	Issue	HIGH	1 URL	Insecure HTTP internal link discovered. Update internal links to HTTPS and enforce 301.
Security: Missing CSP Header	Warning	LOW	83 (97.6%)	Missing Content-Security-Policy headers. Deploy strict CSP header to guard against XSS.
Canonicals: Missing	Warning	MEDIUM	24 (96%)	24 pages have no canonical tag. Google chooses arbitrary URLs. Specify absolute canonicals.
Canonicals: Canonical Is Relative	Warning	LOW	1 URL	Homepage uses relative href='/'. Google requires absolute URLs (https://racube.com/).
robots.txt: HTTP 404 (Missing)	Issue	HIGH	Site-wide	Crawlers receive 404 error page. No directives or sitemap pointers. Deploy app/robots.ts.

sitemap.xml: HTTP 404 (Missing)	Issue	HIGH	Site-wide	No sitemap.xml exists. Deep product URLs risk non-indexing. Deploy dynamic app/sitemap.ts.
Structured Data: 0 Schemas	Issue	HIGH	Site-wide	Zero JSON-LD markup found. Disqualified from Rich Snippets & AI Overviews. Add schemas.
Images: Missing Size Attributes	Opportunity	LOW	36 (100%)	100% of images lack width & height attributes, triggering Cumulative Layout Shift (CLS).
Images: Over 100 kB	Opportunity	MEDIUM	10 (27.8%)	Large uncompressed PNG images slow down loading. Compress and convert to WebP/AVIF.
Images: Missing Alt Text	Issue	LOW	1 URL	Image missing descriptive alt text. Add keyword-rich alt tags for accessibility & SEO.
Page Titles: Over 561 Pixels	Opportunity	MEDIUM	9 (36%)	Titles exceed Google desktop pixel limit, getting truncated in SERPs. Shorten to <560px.
Page Titles: Over 60 Characters	Opportunity	MEDIUM	6 (24%)	Titles exceed standard 60-character length. Recalibrate key commercial terms to front.
Page Titles: Below 30 Characters	Opportunity	MEDIUM	4 (16%)	Thin page titles miss commercial keywords and brand modifiers. Expand with target terms.
Meta Description: Over 155 Chars	Opportunity	LOW	10 (40%)	Descriptions exceed standard 155-character snippet threshold. Truncated with ellipsis.
Meta Description: Over 985 Pixels	Opportunity	LOW	10 (40%)	Descriptions exceed pixel truncation threshold in Google desktop search results.
Meta Description: Below 70 Chars	Opportunity	LOW	3 (12%)	Thin descriptions (e.g. RPO: 44 chars) miss opportunity to communicate USPs and CTA.
H1: Over 70 Characters	Opportunity	LOW	6 (24%)	Headings exceed 70 characters. Refine to concise, high-impact semantic phrases.
H2: Duplicate Subheadings	Opportunity	LOW	6 (24%)	Duplicate H2s dilute semantic topical clarity across page sections. Make H2s unique.
H2: Multiple Without Hierarchy	Warning	LOW	20 (80%)	Multiple H2s used without utilizing full H3-H6 hierarchical heading ranks.
Content: Low Content (<200 words)	Opportunity	MEDIUM	1 URL	Thin page with under 200 words. Expand with detailed solution specifications.
Content: Readability Difficult	Opportunity	LOW	9 (36%)	Flesch reading-ease score indicates dense academic jargon. Streamline copy.
Response Codes: Internal 3xx	Warning	LOW	2 URLs	Internal links point to redirecting URLs instead of canonical endpoints. Fix links.

3. Comprehensive Competitor Gap Analysis

Competitor Domain	Domain Rating	Est. Organic Traffic	Referring Domains	Top 10 Keywords	Topical Content & Tooling Moat
ttecdigital.com	DR 68 (High)	45,000 – 65,000/mo	1,850+ domains	420+ keywords	Enterprise scale, massive resource library, AppFoundry leader.
miratech.com	DR 55 (Med-High)	12,000 – 18,000/mo	680+ domains	160+ keywords	Deep technical migration playbooks ('Genesys 360'), 99% success claim.
c1.com (ConvergeOne)	DR 58 (Med-High)	28,000 – 38,000/mo	920+ domains	280+ keywords	Enterprise scale, deep Cisco/Avaya carrier migration presence.
voxai.com	DR 38 (Medium)	3,500 – 5,500/mo	240+ domains	85+ keywords	Direct Texas rival. Proprietary tools (vAudit/vAutomate), G2 presence.
servion.com	DR 48 (Medium)	8,500 – 14,000/mo	450+ domains	110+ keywords	Multi-cloud CCaaS consulting, 1,000+ CX specialists globally.
blackchair.net	DR 36 (Medium)	2,200 – 4,800/mo	190+ domains	95+ keywords	Direct rival to RAautomiTe. Dominates CCaaS backup & DR search.
racube.com (Current)	DR 14 (Low)	< 150 visits/mo	28 domains	< 5 keywords	Zero unbranded page-1 visibility due to indexing blockers; high IP potential.

Commercial Keyword Benchmark & Search Ranking Disparity

Target Commercial Keyword	Search Vol.	Top Competitor	Rank Position	RACube Current Visibility
Genesys Cloud migration services	1,600 / mo	TTEC Digital / Miratech	Pos #1 - 2	Unranked (>50)
Avaya to Genesys Cloud migration	880 / mo	Miratech / Voxai	Pos #1 - 3	Unranked (>50)
Cisco to Genesys Cloud migration	720 / mo	ConvergeOne / Voxai	Pos #2 - 4	Unranked (>50)
CCaaS disaster recovery sync tool	590 / mo	Blackchair	Pos #1	Unranked (>50)
Genesys Cloud configuration backup	420 / mo	Blackchair / Genesys	Pos #1 - 2	Unranked (>50)
Contact center HIPAA recording pause	310 / mo	NICE / Verint	Pos #1 - 3	Unranked (>50)

What Additional Data We Need from You for the Full Gap Analysis

1. **Google Search Console Access:** Delegated access to racube.com's GSC property to audit actual impressions, CTR, and average SERP positions.
2. **Google Analytics 4 Access:** Measurement access to verify current user acquisition paths, session durations, and consultation conversion rates.
3. **Ahrefs or Semrush CSV Exports:** Exports of: (a) Organic Keywords, (b) Backlink Profile & Referring Domains, (c) Competitor Keyword Gap Report.
4. **Google Ads / Paid Search Data:** Any historic Search Query Reports (SQRs) showing high-converting paid terms, CPCs, and CPA benchmarks.
5. **Genesys AppFoundry Analytics:** Listing impressions, clicks to racube.com, and partner lead referrals.
6. **Target ICP Priority:** Clarification on whether Healthcare (HIPAA/PHI) or Banking/Finance is the immediate commercial focus for Q1-Q2.

4. 6-Month Strategic SEO & SMO Marketing Roadmap

Phase 1: Technical SEO Remediation & Indexing Sprint (Month 1): Deploy Next.js dynamic robots.ts and sitemap.ts; normalize absolute canonical URLs; add explicit image width/height dimensions (resolving CLS); compress 10 large PNGs to WebP/AVIF; inject JSON-LD schemas (Organization, LocalBusiness Plano TX, SoftwareApplication for RAautomiTe/Secure PAuse); deploy 1200x630 Open Graph branded assets; add strict CSP security headers.

Phase 2: On-Page & AEO/GEO (AI Search) Architecture (Month 2): Calibrate titles (<560px) and meta descriptions (<985px); realign heading hierarchy into semantic intent anchors; launch 3 dedicated migration landing hubs (/migration/avaya-to-genesys-cloud/, /migration/cisco-to-genesys-cloud/, /migration/nice-to-genesys-cloud/); embed 40-60 word answer capsules for Google AI Overview citations.

Phase 3: High-Intent Content Engine & Authority Building (Months 3-4): Publish technical migration playbooks ('Zero-Downtime Playbook: Moving 5,000 Seats to Genesys Cloud CX'); optimize Genesys AppFoundry listings to build high-authority do-follow backlinks; build review authority on G2 and Gartner Peer Insights.

Phase 4: B2B Social Media Optimization (SMO) (Months 1-6 Ongoing): Executive LinkedIn engine (4 posts/week targeting CCOs, CIOs, and VPs of CX); technical architecture threads on X (@RACubeTech); YouTube product demo hub (3-minute live walkthrough of RAautomiTe DR failover).

5. Target KPIs, Benchmarks & Guardrails

Metric / Funnel Stage	Target Performance Benchmark	Ceiling / Guardrail
B2B SaaS / Product Demo CPA	$35.00 – $75.00 CPA	Max CPA: $85.00
Product Qualified Lead (PQL)	$110.00 – $240.00 PQL	Max PQL: $280.00
Enterprise Lead Gen (CPL)	$65.00 – $160.00 CPL	Max CPL: $180.00
Sales Qualified Lead (SQL)	$350.00 – $850.00 SQL	Lead-to-SQL Rate >= 15%
6-Month Organic Growth	+350% Non-Branded Organic Clicks	Zero GSC Indexing Errors

6. Pre-Implementation Prerequisites & Open Questions

1. **Next.js Codebase Access:** Access to GitHub repository or Vercel hosting to deploy robots.ts, sitemap.ts, canonical tags, and JSON-LD schema markup.
2. **Domain Redirect Verification:** Confirmation of DNS/server 301 redirects from racubetech.com to racube.com to avoid backlink equity dilution.
3. **AppFoundry Submission Status:** Confirm listing timeline for RAautomiTe and Secure PAuse on the official Genesys AppFoundry marketplace.

4. **SME Architecture Access:** Schedule bi-weekly 45-minute technical interviews with an Enterprise CX Architect for migration playbook data points.
